

February 21 - March 30 (2:45p - 3:45p)

Monday

Watch Me Sculpt

Watch Me Sculpt (WMS) provides an entertaining and educational experience for elementary age children using the art of sculpting in an after school setting. WMS develops self-confidence by providing students with an engaging activity that also teaches a useful skill while increasing fine-motor coordination. While enjoying the art of sculpting, instructors also introduce concepts covering a wide range of educational fields such as science, history, math, technology, geography, and engineering.

Tuesday

Silly Hearts Yoga for Kids

Silly Hearts Yoga for Kids after school Zen Master yoga program is designed specifically for those children who have mastered the ancient art of being awesome! In this hour-long class, children will practice a variety of breathing activities, traditional yoga poses and yoga games. Poses are introduced and taught using visuals, music, and stories. Zen masters will dive into real world skills like how to build confidence and cope with stress in order to increase focus and flexibility. Children will have the opportunity to work with peers as they practice partner poses and build friendships along the way. Classes are modified to meet the needs of the individual students with modifications and support along the way. In this class, there is no expectation for children to be yoga experts- no previous yoga experience is needed to become a Zen Master!

Wednesday

Game Programming

Join First Start Computer Science (FSCS) which offers an exciting world of computer programming for kids of all skill levels. It introduces students to a game programming environment where students bring their imagination to life with the ability to create interactive stories, games, animations, music, art, and presentations. Students can even upload their creations to the Internet to share them with programmers.

After this course, students will have a good understanding of game programming which will help them to explore more on their own and create/browse new complexes from around the world. Kids will clogical reasoning, problem solving, and collaboration skills. Designing projects during this course challenges kids to think creatively. Learning how to overcome obstacles and solving projects. reate programs and learn important mathematical and computer concepts that improve their creative thinking,

Thursday

Karate

We have enlisted the help of the best that Indiana has to offer for our martial arts course. John Adamson is a 7-time USA karate team member who has studied and competed all over the world. For 31 years, his family as taught martial arts right here in Carmel focusing on personal development, respect, and an "I can do anything" attitude. Some former participants of this enrichment course have gone on to become black belts and even national karate champions. Your child will feel 10 feet tall after they experience this fun filled confidence building course.
