

Minefield Mania!

Daniel Keim, Head Counselor

In Minefield, kids are tasked with crossing a “field” of colorful poly spots in correct sequence and placement in order to make it across safely. Only the facilitator knows the pattern and sequence. If students step on an incorrect mat in the sequence, they “blow up,” and must move to the end of the line. Therefore, Minefield is many times about teamwork as kids work together to remember the pattern they’ve discovered so far. This game is great for communication, teamwork, pattern recognition, coordination, and survival skills.

Extreme Connect!

Christian Amaro, Assistant Site Supervisor

Each day at Woodbrook we offer a variety of enrichment clubs for our students to participate in and enjoy. One activity that has grown in popularity in recent years are extreme connect the dots. Now these are not your ordinary dot to dot activities but complex sheets with many numbers with the end result of a cool picture! Our students love a challenge and are always up for a new sheet! There are some starter sheets that are easier for those who are curious about the club, and then some sheets that contain 1,500 dots across two pages!
