

### Necklaces for Firefighters

*Nicole Agnew, Assistant Site Supervisor*

Every semester, we do a community service project at Orchard Park ESE. This past month, we made necklaces for firefighters and Emergency Medical Technicians. We tried to keep the necklaces simple so that they would appeal to as many people as possible. The necklaces were made with little wood discs with inspirational words engraved on them. Some of the words that were engraved on the discs were peace, courage, and dream. The students spent their time designing different ways to tie the discs to the elastic string that was provided. Miss Agnew will drop off the necklaces to different stations in the area.

### New Enrichment Clubs

*Jennifer Gray, Site Supervisor*

On March 12th, OP ESE began our last round of enrichment clubs for the 2017-2018 school year! We have some brand new clubs this time around that participants are really enjoying! Kinetic Sand is a huge hit and allows kiddos to get creative and a little messy. Wall Ball is another new addition that is getting a lot of attention this time around! Kiddos are doing a fantastic job learning the game and new skills each week. Our most popular club this site plan is Computer Lab. Participants enjoy jumping on a computer and playing some of their favorite games from the school day such as Sum Dog, ABCMouse, and Dance Mat Typing.
