ESE Builds "Green" Bird Houses

It is almost springtime, and though Indiana's weather can't decide what it wants to do, our birdies will need some food! We were both creative and green when we made these awesome birdfeeders to hang outside.

We were able to choose from the recycling bin to make the perfect birdfeeder to our liking. We were very creative with popsicle sticks for perches and made windows and doors by cutting out different shapes. Each feeder was unique and carefully planned out by each student. A few of our kiddos even made very large birdfeeders that were more like bird houses, very cool!!

We hung our "ESE" bird feeder outside to encourage our feathered friends to have a snack in our courtyard and enjoy our very green, DIY bird feeders. Way to help the environment and wildlife TM ESE!

Celebrating St. Patrick's Day!

TM ESE had their site celebration by decorating cookies for St. Patrick's Day. Each student got yummy green frosting and fun sprinkles to add to their cookies. After everyone finished decorating their cookies, we had St. Patrick's Day themed worksheets for the students to choose from and fun coloring sheets to do during our Friday Fun-day Movie! TM kiddos love to draw, color, and create! What could make that better than to add a movie and cookies!?
